## Education

### Indian Institute of Technology (ISM) Dhanbad

B.Tech in Civil Engineering – CGPA: 7.67

Expected May 2028

Dhanbad, India

### Alpine Public School, Jhansi

Class XII (CBSE) – Percentage: 80%

2023

Jhansi, India

### Rani Lakshmi Bai Public School, Jhansi

Class X (ICSE) – Percentage: 94%

2021

Jhansi, India

## Projects

### ByteSync | Next.js, TypeScript, Socket.IO, Express.js, MongoDB, Clerk

GitHub — Live Demo

- Built a real-time collaborative code editor with live code synchronization, collaborative cursors, persistent chat, and multi-user coding sessions.
- Implemented multi-file project support with file creation, rename, deletion, and synchronized updates using Socket.IO.
- Developed a session replay system using automatic snapshots and edit-history events, enabling users to replay collaborative coding sessions.
- Integrated code execution for 8+ programming languages using Piston and Judge0 APIs, with Clerk authentication and Dockerized deployment.

### TypeRush | React, TypeScript, Node.js, Express.js, MongoDB

GitHub — Live Demo

- Built a full-stack typing speed platform featuring multiple game modes, live WPM/accuracy tracking, and a responsive space-themed UI.
- Implemented secure JWT authentication with access/refresh tokens, password hashing, and protected user profile management.
- Designed progression systems with XP levels, personal bests, lifetime statistics, and 18 dynamic achievements.
- Developed RESTful APIs and global leaderboards with ranked history, analytics, and customizable themes using TailwindCSS and Framer Motion.

### Personal Portfolio | React, Three.js, React Three Fiber, Tailwind CSS, Vite

GitHub — Live Demo

- Developed an immersive space-themed developer portfolio featuring interactive 3D environments using React Three Fiber and Drei.
- Built an integrated browser mini-game with spaceship controls, laser shooting mechanics, and animated meteorites.
- Implemented customizable themes, glassmorphism UI, pixel-art loading screens, mouse-parallax effects, and scroll-driven animations.
- Optimized rendering performance and responsive layouts to deliver a smooth experience across desktop and mobile devices.

### RoadSOS | Next.js, TypeScript, MongoDB, Capacitor, Leaflet, JWT

GitHub — Live Demo

- Built a hybrid emergency road assistance platform with GPS-based SOS alerts, interactive maps, and community-driven traffic reporting.
- Implemented offline-first architecture using IndexedDB with automatic synchronization to preserve emergency reports during network outages.
- Integrated SMS notifications containing live GPS coordinates and emergency contact information using the Fast2SMS API.
- Developed JWT authentication, role-based admin dashboard, and an AI-powered RoadAid chatbot using Ollama for emergency assistance.

Technical Skills and Interests

---

**Languages:** C, C++, Python, JavaScript, TypeScript, HTML5, CSS  
**Frameworks & Libraries:** React.js, Next.js, Express.js, Node.js, Tailwind CSS, Socket.IO  
**Machine Learning & Data Science:** NumPy, Pandas, Scikit-learn, Matplotlib, Jupyter Notebook  
**Authentication & Backend Services:** Clerk Authentication  
**Databases:** MongoDB, SQL  
**Tools & DevOps:** Git/GitHub, Docker, Postman, VS Code  
**Coursework:** Data Structures & Algorithms, Object Oriented Programming, DBMS, Operating Systems, Machine Learning  
**Interests:** Full Stack Development, Competitive Programming, Machine Learning, Generative AI

Achievements

---

- Peak Codeforces Rating: 1547 (Specialist) Codeforces Profile
- Solved 430+ Data Structures and Algorithms problems on LeetCode LeetCode Profile
- Strong focus on Competitive Programming and Algorithmic Problem Solving
